DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 11-12, 22-27 and 34-41 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicants admitted prior art. Admitted prior art discloses all of the claimed features of the invention including, a saddle ring having an inner bearing surface (31), an eccentric (23) adapted to be connected to a shaft (18) and having an outer bearing surface which engages the inner bearing surface of the saddle ring (see applicants disclosure page 2, lines 18-20), the inner and outer bearing surfaces being complementary where one of the inner and outer bearing surface is concave and the other of the surfaces is convex (admitted prior art figures 1 and 3, where it can clearly be seen in the profile view that the outer surface of the eccentric is convex and inner surface of the ring is concave to receive the eccentric portion as required by claim 2). Two sets of convex rollers are disclosed as rollers 33 and 37 in prior art figures 2 and 3. A saddle shoe is shown as shoe 29, while the two gear rings are shown as gear rings 38 in figure 2.

Allowable Subject Matter

Claims 7-10, 13-21, 28-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-41 have been considered but are moot in view of the new ground(s) of rejection.
